SHOPEASY QA

TEST SUMMARY REPORT | Build 1.0.3 | Staging Environment

1. Executive Summary

Testing was performed for ShopEasy build 1.0.3 over 4–7 days. The project contains 3 epics, 15 user stories and 33 Xray test cases covering 16 requirements. Both planned sprints were completed. Execution recorded 25 Passed and 8 Failed tests. Eight defects were logged; 7 are Closed and 1 remains In Progress.

2. Scope, Environment and Project Details

Item	Details
Application / build	ShopEasy – build 1.0.3
Browser / OS	Google Chrome (latest) / Windows 11
Duration	4–7 days
Scope	Account and Login; Browse and Search; Cart and Checkout
Project structure	3 epics; 15 user stories; 2 completed sprints
Test management	Xray Test Plan and Test Execution; 33 manual tests

3. Test Execution Summary

Status	Count	% of total
Passed	25	75.76%
Failed	8	24.24%
Blocked	0	0.00%
Not Run	0	0.00%
Total	33	100.00%

The eight failures correspond to OBS-1 through OBS-8:
1.invalid registration password accepted
2.ccount unlocked before 15 minutes
3.expired password-reset link accepted
4.case-sensitive product search
5.incorrect high-to-low price sorting
6.cart quantity 11 accepted
7.SAVE10 applied below Rs.1,000
8.and missing Order ID on the UPI confirmation page.

4. Defect Summary

Defect measure	Result
Bugs logged	8
Closed	7
In Progress	1
Defect closure rate	87.50% (7 / 8 × 100)

Severity-wise counts are not included because verified severity values for all eight Bugs were not supplied. Priority and severity are different fields and must not be treated as interchangeable.

5. Quality Metrics

Metric	Formula	Result
Pass percentage	25 / 33 × 100	75.76%
Fail percentage	8 / 33 × 100	24.24%
Defect density per story	8 / 15	0.53
Requirement coverage	16 / 16 × 100	100%

Defect closure rate	7 / 8 × 100	87.50%

6. Risks, Observations and Release Recommendation

Key risk: Failed observations affect account security, password recovery, product discovery, sorting, cart validation, coupon eligibility and order confirmation. These are customer-facing functional requirement violations.

Release recommendation: NO-GO. ShopEasy build 1.0.3 should not be approved for release in its current state. Eight tests failed and one defect remains In Progress. Correct all defects, rerun affected tests, verify every fix and reassess release readiness before approval.

7. Dashboard Evidence

Insert your actual screenshot of the ShopEasy QA Dashboard here before submission. It should show the configured gadgets and real project data.
